

2° International CBRNe Workshop «IW CBRNe 2015»

Giuseppe Noschese MD

The role of Medical Intelligence to reduce the risk NBCRe...A **by terrorists**

INTERNATIONAL CBRNe MASTER COURSES

Master di II livello in "Protection against CBRNe events",

Chemical, Biological, Radiological, Nuclear and explosive
Department of Industrial Engineering and School of Medicine and Surgery
Università di Roma Tor Vergata

There are many questions we are currently asking about the terrorist threat:

- What can the European nations do to defend themselves from the **DAESH** threat during the actual economic crisis?
- How can we defend ourselves from the possible use of agents **NBCRe** by terrorists?
- May a joint civil and military action be advantageous to counter the risk **NBCRe** by terrorists?
- Will the global politics be able to influence the evolution of a possible unconventional event?
- The knowledge in the field of Medicine and Biology will be supportive in the case of **NBCRe** event?
- Could teaching and training be a valuable tool to reduce the risk in the event of a **NBCRe** attack?

These questions do not have answers, the only certainty is that a **NBCRe** event by terrorists is very likely, When? we do not know, Where? we do not know.

What can the European nations do to defend themselves from the **DAESH** threat? To Restrict the freedom of citizen, to improve surveillance and monitoring territories, will this be enough?

Definitely not! Medicine and biology will find more therapeutic solutions, however, but always to apply when the event is occurred and then it will be too late.

Could Exercises and teaching be useful to people?

Of course! But even then it will be too late and then...what?

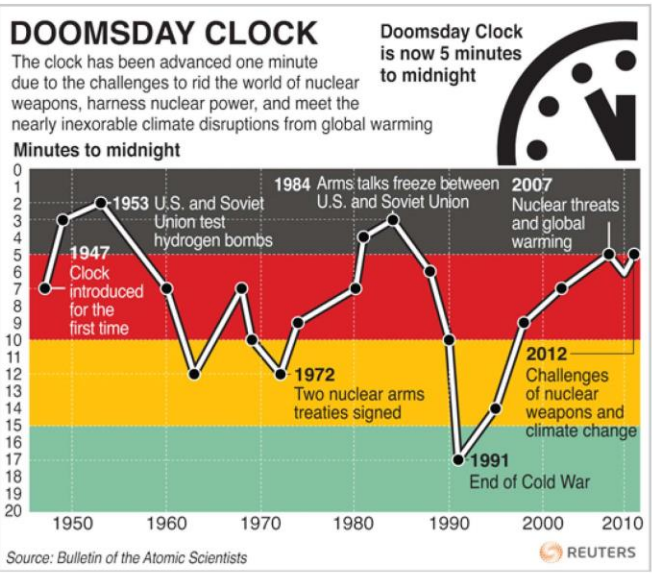

The only solution is to prevent the event from happening, the only weapon to be used is the prevention but to prevent, the action of those who work into the intelligence needs to be complemented by the action of the whole population, everyone must become **HUMINT** (Human Intelligence) which is the last chance to defend of our civilization.

Do not forget the current risk most likely within the **NBCRe ... A**

meaning for "A" the risk of air carriers used as weapons of mass destruction.

THE DOOMSDAY CLOCK

Dr. Giuseppe Noschese A.O.R.N. – A. Cardarelli – NA – (I)
Direttore Unità Operativa Iter Diagnostico e Prima Gestione del Paziente Traumatizzato
Presidente IDMA (International Disaster Medicine Association)
Già Membro Esperto NBCRe - Conferenza sul Disarmo ONU (Ginevra – CH)
